

SERVETEC NEWSLETTER

Volume 1 – June 2013

SERVETEC CERTIFIES WITH FEDERAL AND LOCAL GOVERNMENT

Certification qualifies Servetec to provide services and products to government agencies and municipalities.

General Services Administration, Regional Judicial Centers and San Juan Municipality have certified Servetec to provide security control services.

These certifications fulfill our administrative commitment to serve the security control markets and their needs.

WE HAVE A NEW SERVICE CALL LINE

Effective March 7, 2013, our service call line will be 787-272-1908. This number will also be our FAX line. The phone line 787-760-5094 will be phased-out to allow our customer base time to transition to new phone as planned.

UNIT ASSESSMENT PROGRAM

We will be offering a Unit Assessment Program where we can assess the capacity of the units to meet requirements, the risks their condition may create and the provide critical recommendations that assures and optimizes operational continuity. The assessment serves to also profile the unit components and accessories for future reference. The reliability of security systems is critical important to the investments already in place and the risks that it may pose to the protection of clients, employees and property. Call to obtain more information and how your particular needs can be best assessed through our Unit Assessment Program (UAP).

“We serve the customer needs for optimizing their investment, risk management, personnel protection through efficient and reliable access control systems” – our mission

METAL DETECTION UNITS

We offer various alternatives to weapon detection for airports, ports, health institutions, state and federal courts, municipality facilities, prisons, events, entertainment and cultural facilities, and commercial stores. High performance and programmable walk through detectors can be easily installed and serviced to meet stringent control and high discrimination of metals.

ANNUAL SERVICE CONTRACTS

The access control units and their corresponding hardware for control and metal detection require periodic checks and preventive maintenance to insure their optimal operational continuity. We offer various alternatives to our customers to insure their investment, risk management and commitment to

Government Detection Systems

Refurbished installation

protecting employees, clients and property. Contracts include all service calls, spare parts and key components.

SPARE PARTS

We stock various spare parts for structural and electronic accessories associated with Access Control Vestibules (“Mantrap”) units and pass through Metal Detectors. Call us for more information on your needs for parts.

UPGRADE KITS

The vestibule access control units installed in the field may need to be updated to a more advanced and reliable electronic control system. We have developed an upgrade kit which can be installed in older models of Novacomm, Isotech and Hamilton units and increase their reliability and proper operational control. Call for more information.

REFURBISHED VESTIBULE UNITS

We have acquired a number of used access control vestibule units and have refurbished them with new electronics and made them available under a one year warranty. Call for quotation.

“We wish to express our appreciation to all our customers for the opportunity to serve”
